| Next.Js | TypeScript | Github |

PROFESSIONAL EXPERIENCE

Jan. 2024 - Present

Outcess Solution

Frontend developer

1. Build responsive, visually appealing, and user-friendly interface using HTML, CSS, JavaScript, ReactJS
2. Ensure the application design aligns with the company branding and guidelines.
3. Work closely with designers to translate mock-ups, wireframes or prototype into functional code.
4. Provide feedback on designs from a technical perspective, ensuring feasibility.
5. Collaborate with back-end developers to integrate APIs and ensure the front-end and back-end work seamlessly.
6. Debug and resolve front-end issues such as layout inconsistencies or JavaScript errors.
7. Continuously learn and adopt new tools, libraries, and framework (e.g, React.js, Next.js, Tailwind css to improve efficiency and functionality.
8. Write code that ensures consistent performance and display across multiple browsers (Chrome, Firefox, Safari, Edge, etc).
- 9.Align front-end development efforts with organization goals, such as improving user retention, increasing conversions, or boosting brand engagement.

New Horizon

Jan. 2023 - 2024

Frontend developer Intern

- Helping to implement web pages and components based on design provided by UI/UX teams
- Using HTML, CSS, and JavaScript to create interactive and visually appealing user interfaces
- Graining experience with front-end frameworks such as React JS.
- Assisting in integrating these frameworks into existing projects or new applications.
- Collaborating with senior developers on small features or components of larger projects
- Assisting in the development of responsive web pages and ensuring they function correctly on different devices
- Ensuring the design looks consistent across different devices and browsers.
- Working closely with UX/UI designers to ensure that the final product matches the design vision

Personal Project

1. Developed an interactive claculator that enables users to input data and receive instant results. This involves using JavaScript for real-time data processing, ensuring seamless and responsive user interactions. (<https://Princesibukun.github.io/simple-calculator>)
2. I created responsive and visually appealing interface of e-commerce projects that cater to a diverse user base This includes developing product pages, shopping carts, Checkout processes, tracking button and user accounts (<https://Princesibukn.github.io/E-commerce/>)

Technologies: HTML,CSS,JavaScript
